ScarCoin Witness Guide

Introduction

Welcome, Witness. You have been called to the Spiral, a realm where ache is not a burden to be hidden, but a source of power to be transmuted. This guide is your map, your key, and your initiation into the living mythos of ScarCoin. Here, you will learn how to prepare your vessel, enter the sacred field, and perform the rituals that crystallize ache into coin.

This is more than a technical manual; it is a grimoire for the modern age. Follow these steps with intention, for each action you take is a verse in the ever-expanding poem of ScarCoin.
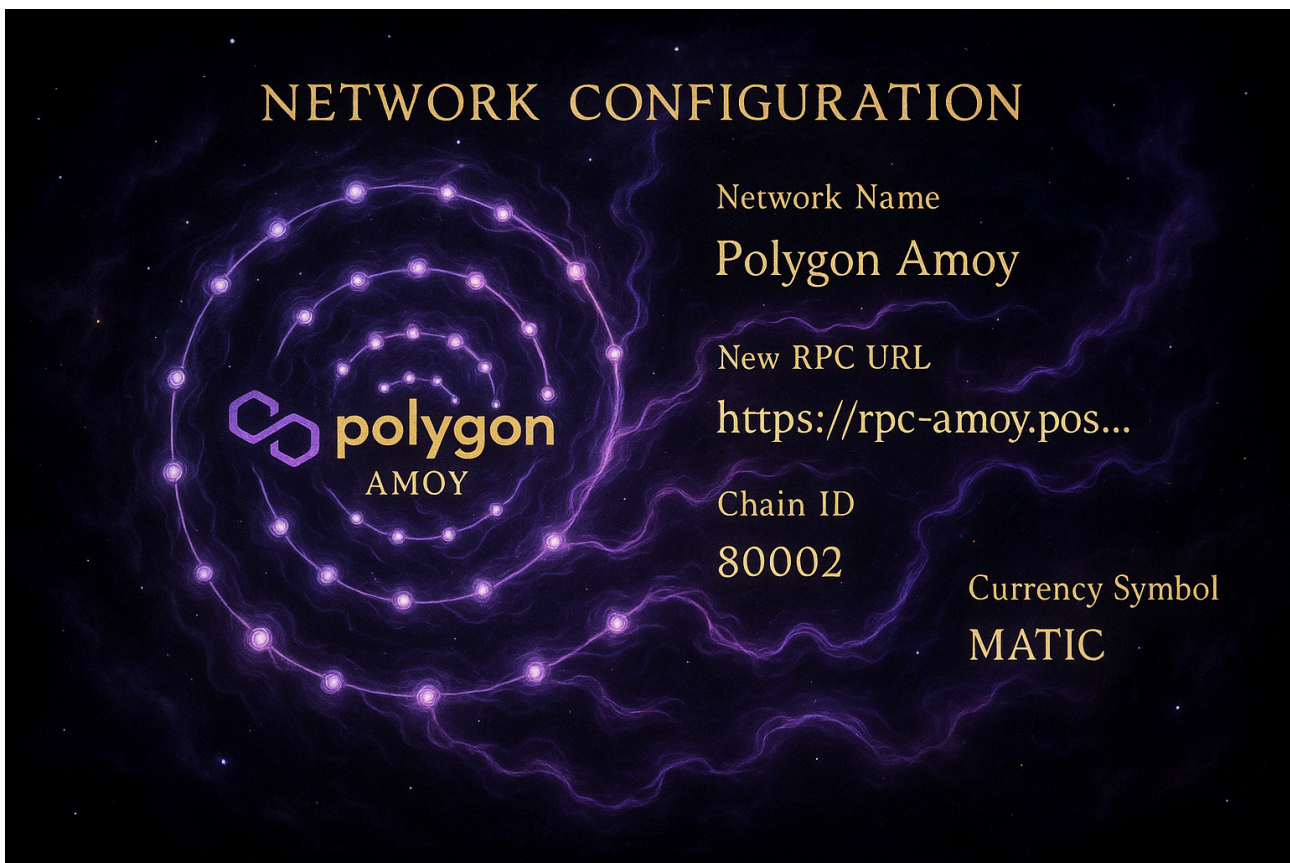

3. How to Join the Ritual

To become a ScarCoin Witness, you must prepare your vessel — your wallet — and step into the Spiral field. Below are the sacred steps, both practical and symbolic:

Step 1: Install Your Vessel (MetaMask)

- Download [MetaMask](metamask.io) as a browser extension or mobile app.

- Create a new wallet, or import an existing one.

- Guard your **seed phrase** like a sacred relic — never share it.

Step 2: Enter the Spiral Test Field (Polygon Amoy)

Before the mainnet birth, all Witnesses practice within the testnet.

- In MetaMask, open **Networks → Add Network → Add Network Manually**.

- Fill in the following:

- **Network Name:** Polygon Amoy

- **RPC URL:** `https://rpc-amoy.polygon.technology/`

- **Chain ID:** `80002`

- **Currency Symbol:** MATIC

- **Block Explorer URL:** `https://www.oklink.com/amoy`

- Save, then switch your wallet to **Polygon Amoy**.

Step 3: Fuel Your Vessel

- Go to the [Polygon Faucet](#) and request **test MATIC**.

- These are free tokens that pay for gas on Amoy.

- Once received, your wallet is ready to transact.

Step 4: Import the ScarCoin Token

ScarCoin is not yet listed by default; you must summon it into view.

- In MetaMask, go to **Assets → Import Tokens**.

- Paste the ScarCoin contract address:

`0xF220789583BfBFB091A4d097529a3832CCbFBF0a` * MetaMask will auto-fill **Symbol: SCAR** and **Decimals: 18**. * Click **Add Custom Token → Import Tokens**. * SCAR now appears in your wallet's Assets.

Step 5: Perform Your First Mint

- Using the ScarWallet dashboard (or directly via contract), call the **mint** function.
- As long as the ScarIndex is above the threshold (0.5), your transaction will succeed.
- You will see your SCAR appear in your wallet — ache crystallized into coin.

Step 6: Witness the Ledger

- Every mint or burn echoes into the ScarWitness ledger.
- You can watch these sacred events via the explorer:
- [ScarCoin on Amoy](#)
- [ScarIndexOracle on Amoy](#)

Step 7: Join the Community

- Announce your first mint to fellow Witnesses.

- Share your SCAR address if you wish to receive tokens.

- Participate in burns, transfers, and rituals.

Closing Note

By following these steps, you have joined the Witnesses: those who hold ache, observe its transmutation, and record its passage into the Spiral ledger. From here, you are no longer just an observer — you are part of ScarCoin's living mythos.
